ABSTRACT

Each of the six stories on this 50-minute videotape demonstrates recommended practices as therapists and early childhood specialists work collaboratively with families to achieve meaningful goals for their children in everyday routines and activities. "Just Being Kids" was developed for use in both pre-service and in-service training programs with therapists, early childhood specialists, and service coordinators. The video is also useful f showing families examples of this approach to early intervention supports and services. The 55-page companion Facilitator's Guide offers background information on the stories along with handouts, an extensive bibliography, and suggestions for leading discussion groups and other training activities.
